

KAVYA KUSHWAHA

Unnao, Uttarpradesh 209801

📞9559004334 ✉️kushwahakavya37@gmail.com [🌐linkedin.com/in/kavya-kushwaha-073b49378](https://www.linkedin.com/in/kavya-kushwaha-073b49378) [🔗Kavya25007](#)

Career Objective

A passionate and dedicated Computer Science (AI & ML) student aspiring to pursue a Software Engineer role, with hands-on experience in developing real-world projects such as document scanning systems, password security tools, and waste classification applications. Possessing a strong foundation in programming languages, including C, C++, and Python, along with problem-solving and emerging technologies, with a keen interest in building efficient and user-centric solutions. Eager to learn, grow, and contribute to innovative and impactful technology-driven projects.

Education

Tertiary Education: Bachelor of Technology in Computer Science Engineering (AI & ML) (2025 – Present)

Chandigarh University Unnao, Uttar Pradesh

Programming for Problem Solving (PPS), Python Programming, Data Structures & Algorithms (DSA), Computer Networks, Network Security, Cybersecurity, Mathematics, Computer Ecosystem.

Senior Secondary Education: CISCE Board

Shri Jagannath Shah Memorial Public School, Unnao – Percentage: 79.6 (2023 – 2024)

Secondary Education: CISCE Board

Shri Jagannath Shah Memorial Public School, Unnao – Percentage: 86.6 (2021 - 2022)

Projects

Waste Classifier | Python, Machine Learning

- Built a classification system to **categorize waste materials** for efficient waste management.
- Applied machine learning concepts to improve classification **accuracy** and **performance**.
- Contributed to sustainable solutions by automating **waste segregation processes**.

DocScan – Document Intelligence Web App | HTML, CSS, JavaScript, Azure AI

- Developed a document processing web app using **Azure Document Intelligence** to extract text and tables.
- Implemented multiple **input methods**, including file upload, drag-and-drop, and URL-based processing.
- Designed a responsive UI with real-time **results** and **downloadable outputs** for better usability.

Nimbus Loan Management System | C Programming

- Developed a modular **loan management system** using C with structures, dynamic memory allocation, and multiple source/header files.
- Implemented features like **loan record storage**, fine **calculation**, **defaulter identification**, and summary reporting.
- Designed **efficient memory handling** using malloc() for dynamic data storage and processing.

Technical Skills

Languages and Frameworks: C++, C, Python

Databases: Firebase Realtime Database

Development Tools & Technologies: VS Code, Android Studio, GitHub, API Development, NLP

Interpersonal Skills

Communication, Collaboration, Adaptability, Problem-Solving, Project Management

Achievements

- Qualified **Joint Entrance Examination (JEE)** (2025)
- Completed multiple industry-recognized **certifications** in AI, Cloud, and Cybersecurity
- Built real-world projects, including a **Document Scanner**, **Password Security Tool**, and **Waste Classifier**
- Actively developing problem-solving skills through programming practice

Certifications

- **Nutanix Certified Professional – Multicloud Infrastructure 6**
- **Microsoft Certified: Azure Fundamentals**
- **AI Fundamentals: Foundations for Understanding AI – IBM SkillsBuild**

- **Cybersecurity Fundamentals – IBM SkillsBuild**

Hobbies and Interests

- Coding
- Exploring new technologies
- Traveling and exploring historical places (forts)
- Listening to music
